

ACO Hygiene First Hygienic Drainage for Food Processing & Commercial Kitchen Applications

User Guide for Autodesk Revit files

The ACO HF Kitchen Channel Range

ACO HF Kitchen Channels are divided into two types:

- ACO HF Channel Standard Edge for Tile, Concrete or Resin Floors
- ACO HF Channel Extended Edge for Thin Bed Installation

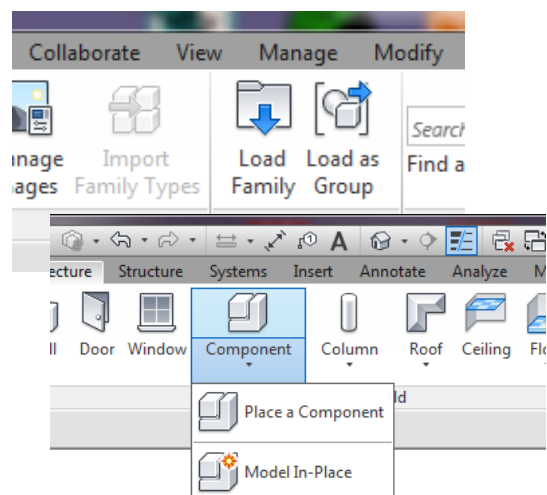

Each range has a number of width and length configurations.

Loading ACO HF Kitchen Channels files into your project

Each system is modelled as a generic family that can simply be loaded into your project.

1. Download the relevant ACO HF Kitchen Channel file and save it to a suitable location.
2. Open your project and navigate to an appropriate view.
3. Navigate to the “insert” icon on the Revit ribbon and click “Load Family”.
4. Select the ACO HF Kitchen Channel file you saved earlier.
5. The file can now be placed into your project. Navigate to the “Architecture / Component” icons on the Revit ribbon and click “Place a Component”

Note that all the ACO HF Kitchen Channels are “floor” based Items.

Using the ACO HF Kitchen Channel Range

Step 1: Select the required channel type

The Revit families list includes all the sizes in single family elements.

Manipulation:

The family components can simply be placed and arranged using the standard Revit “modify” tools of Move, Copy, Rotate and Align.

Type Properties

The ACO HF Kitchen Channel files have a collection of useful information embedded with it, including site installation and operations and maintenance details.

This information, along with much more is stored within the files or available through hyperlinks within the component type properties.

1. To access the information within a component, simply select the item and click the “Type Properties” icon on the Revit ribbon at the top of the dialogue.
2. The “Type Properties” information screen will now display. Simply scroll up and down the screen to find the information you require.

Materials Library & Notes

The ACO HF Kitchen Channel files contain materials that are already pre-loaded into the components. The files can be pre-loaded into you company template.

ACO HF Kitchen Channels have been created in Revit 2014
